(a) protocol-A coverage vs m
coverage of $\phi(\theta^*)$
held-out size m
paper CI
joint bootstrap
nominal 0.95
(b) price of valid inference
width(joint) / width(paper)
held-out size m
(c) variance budget
share of total variance
training
evaluation
constraint set D'
Adult (DI)
ACSIncome (DI)
COMPAS (DM)
(d) component sizes
standard error (log)
training
evaluation
constraint D'
Adult (DI)
ACSIncome (DI)
COMPAS (DM)
